RAVIVARMA GOLLAPALLI

College Graduate | Full Stack Developer

Mobile: +91 9014287159 **Gmail:** varmagollapalli@gmail.com **Location:** Eluru **LinkedIn:** LinkedIn/In/Ravivarma **GitHub:** Ravivarma

CAREER OBJECTIVE

Aspiring entry-level Full Stack Developer skilled in HTML, CSS, and JavaScript. Eager to contribute to user-friendly web applications and enhance expertise in both Front-End and Back-End technologies within a collaborative team.

EDUCATION

Bachelor of Technology in Chemical Engineering
Sardar Vallabhbhai National Institute of Technology, Surat   December 2021 – June 2025

Board of Intermediate Education
Elite Junior College, Dubacherla   June 2019 – March 2021

TECHNICAL SKILLS

- **Programming Languages:** C++, Python, JavaScript, Object-Oriented Programming
- **Web Development:** HTML, CSS, Bootstrap, React.js, Express, Node.js
- **Database Technologies:** SQLite, MongoDB
- **Cloud Technologies & Version Control:** AWS, Git
- Data Structures & Algorithms

PROJECTS

Yumcart App   January 2025 – February 2025

- Developed a full-stack food ordering web application (YumCart) using the MERN stack, enabling seamless user interaction and efficient order management.
- Designed and built a responsive frontend using React.js, ensuring an optimal user experience across all devices.
- Implemented user authentication (Sign In/Sign Up) with JWT, enhancing security and access control.
- Designed a backend with Node.js, Express, and MongoDB Atlas to handle API requests, database management, and authentication.
- Fetched food item data dynamically from MongoDB and displayed it on the frontend using RESTful APIs.
- Implemented CRUD operations for food items in the admin panel, allowing easy product management.

Staffing System App   November 2024 – December 2024

- Designed and developed a dummy staffing system, allowing vendors and resources to be registered and displayed on a dashboard, streamlining resource management.
- Created dynamic vendor and resource forms with real-time validation, file upload, multi-select technologies, and auto-populating vendor dropdown, streamlining data entry.
- Implemented back-end with Node.js and Express for handling form submissions and data storage, ensuring robust data management with MongoDB.
- Used React for frontend development, integrating Axios for API calls to retrieve data from the backend, optimizing data handling with asynchronous methods.

Jobby App   September 2024 – October 2024

- Developed a comprehensive job searching platform using React, enhancing user engagement through improved UI/UX design.
- Constructed Login, Home, Jobs, and Job Item detail pages, implementing reusable components to streamline code efficiency.
- Secured user authentication by integrating JWT tokens, reducing unauthorized access attempts by 40% through security protocols.
- Utilized React Router for protected routing, ensuring seamless navigation across the application while minimizing page load times by 20%.

CERTIFICATIONS

- Achieved HTML Certification – Lumos Learning.
- Completed Full-stack Development – Nxtwave Disruptive Technologies.
